Toolkit Beta Site

Primera implementació del model LRM

<https://beta.rdatoolkit.org/RDA.Web>

Projecte 3R

Objectius

- **R**estructurar i **R**edissenyar l'**R**DA Toolkit.
- Incorporar el *Model de referència per a les biblioteques de l'IFLA = IFLA Library Reference Model (LRM)*.
- Millorar RDA per a l'ús en aplicacions de dades enllaçades.

Consideracions

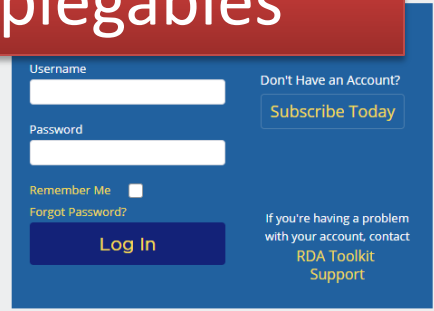

- Només en anglès. No és encara la versió oficial.
- La traducció catalana es preveu per al 1r trimestre de 2020.

RDA Toolkit - Reestructuració

The screenshot shows the RDA Toolkit website interface. The top navigation bar includes 'R | D | A TOOLKIT', 'Help', 'English', and 'Submit Feedback'. Below this, a secondary navigation bar contains 'ENTITIES', 'GUIDANCE', 'POLICIES', and 'RESOURCES'. A search bar is also present. The 'ENTITIES' menu is open, displaying a list of RDA entities: RDA Entity, Work, Expression, Manifestation, Item, Agent, Person, Collective Agent, Corporate Body, Family, Nomen, Place, and Timespan. The 'Agent', 'Collective Agent', 'Nomen', and 'Timespan' items are highlighted with red boxes. A green callout box explains that 'Entitat RDA' is a subclass of 'Res' and a superclass of all other RDA entities. A red callout box states that these are new entities from the LRM conceptual model. The background shows a news section with a title 'April Update to the Beta Site'.

Definition and Scope

A person or two or more persons capable of acting as a unit.

Prerecording

Describe an entity by recording a *metadata description set* that consists of one or more *metadata statements* using one or more elements assigned to the entity.

An element may be used more than once.

Record elements that are deemed useful for identification and access.

OPTION

Record elements that are specified by an *application profile*.

For general guidance, see [Application profiles](#)^[2].

Use one or more of the recording methods to identify or label an entity.

Use one recording method to provide an appellation or IRI of an entity as a value of a relationship element.

Recording

Minimum description of an agent

A minimum description of an agent must include at least one of the following

Al final de la pàgina

creator|

creator agent of expression of^[2]

creator agent of manifestation of^[2]

creator agent of work of^[2]

Pàgina d'element

Agent > creator agent of work of

creator agent of work of

Definition and Scope

A work that involves a responsibility of an agent for creation.

[Element Reference](#)

Prerecording

Recording

Record this element as a value of Work: [appellation of work](#)^[2] or as an IRI.

Recording an unstructured description

Record an unstructured description for a related work as a value of Work: [title of work](#)^[2].

For general guidance on unstructured descriptions, see Recording methods: [Recording an unstructured description](#)^[2].

Recording a structured description

Record a structured description for a related work as a value of Work: [access point for work](#)^[2].

Relationship matrix

Agent

Entities related to an agent

To record an association between this entity and a related entity, use a relationship element that is sufficiently specific to meet the needs of an agent who creates the metadata.

Select an appropriate relationship element from the list for the related entity:

- Agent to Agent
- Agent to Collective Agent

Agent to Work

addressee of²³: A work or part of a work that is addressed to an agent. *Inverse*: **addressee**²³.

agent described in²³: A work that describes a described agent. *Inverse*: **description of agent**²³.

aggregator of²³: A work that involves a responsibility for aggregation by selecting and arranging its components. *Inverse*: **aggregator**²³.
